

Planning for Disaster Mitigation & Recovery

URP:6280:OEXW

Fall 2021

6:30-8:30 pm Thursdays

Virtual Classroom

Instructor: Jim Schwab

(Urban Planner, Author, Speaker)

Urban planners and other public sector professionals can play a vital role in both reducing loss of life and property from natural disasters, and in helping communities recover from them.

This course:

- Examines the 2 key areas of hazard-related public policy: hazard mitigation and post-disaster recovery.
- Helps professionals to distinguish the specific fields of public sector activity in which they can contribute to make communities safer and more resilient in the face of natural and other disasters, including pandemics.
- Addresses the need to adapt a community's building and infrastructure standards to deal with the hazards posed or exacerbated by climate change.
